Art Unit: 1631

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1631.

Claims 1-7 and 23-56 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper Nos. 5 and 8.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 57-62 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This rejection is repeated for reasons already of record (e.g., Office action mailed September 18, 2001, page 4). Applicants' arguments (paper no. 15, pages 3-4) are not convincing. First, neither Berger et al (Acta Anat. (Basel) 162: 95 (1998)) nor Chen et al (Nat. Genet. 1 : 204 (1992)) is of record. Second, Berger et al cannot be used to support the notion of a well established or readily apparent utility because it was published (1998) subsequent to the effective filing date of the instant application (1994). Third, no alignment of SEQ ID NO: 74 and the Norrie gene is in the record. Fourth, applicants do not point to those parts of the application that teach how to use SEQ ID NO: 74 or what the meaning of any possible results of any putative assay might be. Fifth, the application itself discloses (see page 49, lines 27-29) that SEQ ID NO: 74 corresponds to no known protein in stating, "SEQ. ID. NOS.: 1-93 represent those sequences which did not demonstrate identity with known amino acid sequences." Thus, the argument that one of skill in the art upon reading the instant application would find it readily apparent what to use SEQ ID NO: 74 for and how to use SEQ ID NO: 74 is most unconvincing.

Claims 57-62 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. This rejection is repeated for reasons already of record (e.g., Office action mailed September 18, 2001, page 4). The discussion in the previous rejection hereinabove is incorporated here.

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
